

SEMINAR SERIES IN BIOSTATISTICS

Prof. Lorenzo Richiardi

Department of Medical Sciences
University of Turin
Italy

May 9, 2019

15:30 - 16:30

Seminar Room: Aula De Lillo

Building U7 - 2nd floor

Baseline selection and collider bias in cohort studies

There is debate on whether representative cohort studies are more valid than cohort studies based on a selected population. I will discuss the concept of representativeness and generalizability in cohort studies, the impact of collider bias in representative and selected cohort studies and its link with confounding and selection bias.
